Education

University of Toronto Sep 2023 - Apr 2028
Bachelor of Applied Science in Computer Engineering + Co-op *Toronto, Ontario*

- Available for a **4 month internship from May 2027**, aiming to convert to full-time graduate roles
- **Minors**: Artificial Intelligence (Completed) and Business
- **Coursework**: Data Structures & Algorithms (C++), Operating Systems (C), Scalable Software Architecture, Applied Machine Learning (Python), Deep Learning & Neural Networks, AI Autonomous Agents

Experience

Snowflake Jun 2026 - Dec 2026
Software Engineer Intern *Menlo Park, California*

- Engineered **Java** and **Python** ETL pipelines for multi-deployment log analysis across Global Manageability and presented cross-team RCAs, resolving account creation bottlenecks to drive success rates from **38% to 99% SLO**
- Built a **Streamlit** observability dashboard using advanced **SQL** to profile account lifecycle events, enabling rapid visual debugging of production logs to save **10+ hours weekly** for on-call incident resolution
- Architected multi-agent workflows via **MCP** to autonomously triage critical incidents by transforming JIRA tickets into GitHub PRs, streamlining code reviews and domain knowledge distribution to accelerate resolution by **40%**
- Engineered **embedding-based semantic routing** and **intent classification** pipelines for Snowflake's Cortex AI, dynamically mapping unstructured enterprise queries to specialized agent skills and boosting query-to-skill routing accuracy from **18% to 96%** to drive higher AI adoption and enable seamless self-service data analytics

Canada Life May 2025 - Aug 2025
Software Engineer Intern *Toronto, Ontario*

- Collaborated with Sponsor Billing and Finance team to develop a group insurance billing platform using **C#**, **ASP.NET Core**, and **Microsoft SQL Server**, automating invoicing for admins, cutting manual work by **95%**
- Built a **React** and **Vite.js** dashboard for real-time invoice generation, transforming days of manual work into seconds with responsive UI/UX integrated with **GitLab CI/CD** pipelines for automated deployments
- Redeveloped VBA onboarding system in **Microsoft Access** using optimized **SQL Server** queries, cutting high-priority break/fix incidents by **90%** for developers and boosting onboarding efficiency for business users

Royal Bank of Canada May 2024 - Aug 2024
Lead Software Engineer Intern *Toronto, Ontario*

- **Led an agile team of 5 developers** to design and streamline the financial plan verification process for Advisors, collaborating with business stakeholders to build a custom business rules engine
- Owned project, delivering a scalable, **Java**-based **Spring Boot** microservice automating daily batch validation for **150+ financial plans**, ensuring quality through code reviews, achieving **3 production releases in 8 weeks**
- Engineered an **Oracle SQL** data pipeline with seamless external RESTful API integrations, powering an **Angular** dashboard used daily by over **200 financial advisors** across Canada, reducing manual validation time by **75%**

Projects

MomanTick - Low-Cost Event Ticketing Platform | *React Native, Expo, Firebase, Stripe API, Google Cloud*

- Solely architected an **end-to-end, fully responsive web application** using React Native, engineering distinct user experiences for Organizers and Attendees to streamline workflows from ticket creation to on-site entry
- Designed a disruptive **"Cost-Plus" financial model** integrated with the Stripe API, **undercutting industry giants by over 50%** to maximize revenue retention for event organizers
- Scaled to **120+ active users** and processed over **$1,100** in live ticket sales within a two-week beta launch
- Deployed Google Cloud Functions and **secure Firebase authentication** to power stateful transaction loops, delivering real-time features like live sales analytics and **QR code scanning** to ensure seamless event operations

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, C#, C, C++, HTML, CSS
Frameworks: React, React Native, Expo, Angular, Node.js, Spring Boot, ASP.NET Core, Flask, FastAPI, Streamlit
AI & Agentic Stack: Autonomous Agents, RAG, MCP, Context/Memory & Token Optimization, Agent Skills
Developer Tools: Git, GitHub, Grafana, Linux/Unix, SSH, GCP, Firebase, Stripe, Cursor, Glean, AI Code Reviewers
Libraries: PyTorch, Scikit-learn, Redis, OpenCV, TensorFlow, Hugging Face, Pandas, NumPy, Matplotlib
