Education

University of Toronto Sep 2023 - 2027
Bachelor of Applied Science in Computer Engineering *Toronto, ON*

- Available for **4-8 month internships from Sep 2026**, aiming to convert to full-time graduate roles
- **Minors**: Artificial Intelligence and Business
- **Coursework**: Data Structures and Algorithms (C++), Operating Systems (C), Machine Learning, Deep Learning

Experience

Snowflake Jun 2026 - Sep 2026
Incoming Software Engineering Intern *Menlo Park, CA*

- Selected for the **Global Platform** team to build backend **Manageability** services using **Java** and **Python**, focusing on high-scale infrastructure for organization governance and global account orchestration

Canada Life May 2025 - Aug 2025
Software Engineering Intern *Toronto, ON*

- Collaborated with Sponsor Billing and Finance team to develop a group insurance billing platform using **C#**, **ASP.NET Core**, and **Microsoft SQL Server**, automating invoicing for admins, cutting manual work by **95%**
- Built a **React** and **Vite.js** dashboard for real-time invoice generation, **transforming days of manual work into seconds** with responsive UI/UX integrated with **GitLab CI/CD pipelines** for automated deployments
- Redeveloped **VBA** onboarding system in Microsoft Access using optimized **SQL Server** queries, cutting high-priority break/fix incidents by **90%** for developers and boosting onboarding efficiency for business users

Royal Bank of Canada May 2024 - Aug 2024
Lead Software Engineering Intern *Toronto, ON*

- **Led an agile team of 5 developers** to design and streamline the financial plan verification process for Advisors, collaborating with business stakeholders to build a custom business rules engine
- Owned project, delivering a scalable, **Java-based Spring Boot microservice** automating daily batch validation for **150+ financial plans**, ensuring quality through code reviews, achieving **3 production releases in 8 weeks**
- Engineered an **Oracle SQL** data pipeline with seamless external **API integrations**, powering an **Angular** dashboard used daily by over **200 financial advisors** across Canada, reducing manual validation time by **75%**

Royal Bank of Canada Jul 2023 - Aug 2023
Software Engineering Intern *Toronto, ON*

- Collaborated with RBC's digital team to enhance UI consistency, developing **4 maintainable Angular and React web components** for organization-wide standardization
- Performed unit and end-to-end testing with **Jest** and **Cypress**, achieving **over 80% code coverage** aligned with Figma designs for high-quality components
- Enhanced customer usability and accessibility, boosting developer productivity by **over 30%** with UI components adopted by around **1,000 engineers** across development teams

Projects

MomanTick - Low-Cost Event Ticketing Platform | *React Native, Expo, Firebase, Stripe API, Google Cloud*

- Solely architected an **end-to-end, fully responsive web application** using React Native, engineering distinct user experiences for Organizers and Attendees to streamline workflows from ticket creation to on-site entry
- Designed a disruptive **"Cost-Plus" financial model** integrated with the Stripe API, **undercutting industry giants by over 50%** to maximize revenue retention for event organizers
- Scaled to **120+ active users** and processed over **$1,100** in live ticket sales within a two-week beta launch
- Deployed Google Cloud Functions and **secure Firebase authentication** to power stateful transaction loops, delivering real-time features like live sales analytics and **QR code scanning** to ensure seamless event operations

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, C#, C, C++, HTML, CSS
Frameworks: React, React Native, Expo, Angular, Node.js, Spring Boot, ASP.NET Core, Jest
Developer Tools: Git, GitHub, Firebase, Stripe API, Vercel, Linux/Unix, SSH, Google Cloud Platform, Figma
Libraries: PyTorch, Scikit-learn, Redis, OpenCV, TensorFlow, Hugging Face, Pandas, NumPy, Matplotlib
